Terminal I

Data Entry & Visual Inspection 1

- ➔ Terminal with LCD 22"-Screen
- ➔ Industrial PC
- ➔ Barcode Reader
or
- ➔ Automatic Number Plate
Detection with integrated Camera

Terminal II

Emission & Headlight Test

- ➔ Terminal with LCD 42"-Screen
- ➔ Camera for Recording and/ or pictures
- ➔ Automatic Headlight Tester
(approx. 35s per Test)
- ➔ Emission Tester
regarding local specifications

Terminal III

Track, Suspension & Brake Test

- ➔ Terminal with LCD 22"-Screen
- ➔ Brake Tester (Special Version for Inspection Center)
- ➔ Suspension Tester
- ➔ Side Slip Tester

BOSCH

ICperform - Anti Manipulation System for Test Organizations

Terminal IV

Sound level Check & Visual Inspection 2

- ➔ Terminal with LCD 22"-Screen (in Pit or beside the Lane)
- ➔ Sound Level Meter
- ➔ Visual Inspection above a Pit

Terminal V

Main Terminal Test Lane Administration

➔ Tasks

- Inspector Controlling
- Error Codes Vehicle Categories
- Reference values
- Protocol-Print out (Customer Specific)
- Test Value Storage
- Data base (back up)

BOSCH

Overview of an Inspection Center

Max. 10 Lanes
Up to 8 Vehicles

80 Vehicles at same time

**Testing time:
< 2.5 min/ Veh.**

1.000 Vehicle per day

Data Server in Inspection Center

➔ Equipment

- Protected HP Server
- Back-Up-Solution

➔ Tasks

- Test Value-Storage
- Database-Administration
- Transfer of Values to governmental Database

ICperform - Anti Manipulation System for Test Organizations

Optional Safety 'Add-ons':

- ➡ Access control
- ➡ Inspector verification.
- ➡ Time & Attendance.
- ➡ Fingerprint

BOSCH

ICperform - Anti Manipulation System for Test Organizations

Why is ICperform an Anti-manipulation system?

- Picture of the vehicle is captured and can be saved with the result in the database.

The screenshot shows the ICperform software interface. At the top, a green banner displays 'ST:1 LINE:3' and 'TEST-03.05.12-36 - PASS'. Below this, the 'Documentation - TEST-03.05.12-36' section contains various input fields for vehicle details. To the right, the 'Query' section shows a list of inspection results. On the far right, a 'Photo' section displays a photograph of a vehicle with license plate 'MUFJ 333'.

ICperform - Anti Manipulation System for Test Organizations

Why is ICperform an Anti-manipulation system?

- ➔ On-line monitoring of ALL test lanes
- ➔ Access to line operating system
- ➔ Control of test procedure
- ➔ Storage of test lane log
- ➔ Access to test results.

Availability of full controlling system to be used internally or externally with possibility to stop the test at any time if anything goes wrong.

- ➔ Positions of lane terminals are saved
- ➔ Each terminal can be monitored by the Bosch Security Management Software
- ➔ Test lane can be controlled by an officer of a governmental institution
- ➔ Complete test lane can be deactivated by found of improper testing.

Why is ICperform an Anti-manipulation system?

- There are a lot of add-on features to recognize each inspector. By this way there is identification for each test by whom the vehicle is inspected. Examples of add-on Feature for this purpose: - Finger print - Card identification
